5. TESTS PRESENTATION

5.1. TEST PROCEDURE

BTS are able to operate under the following external extreme temperatures and voltages:

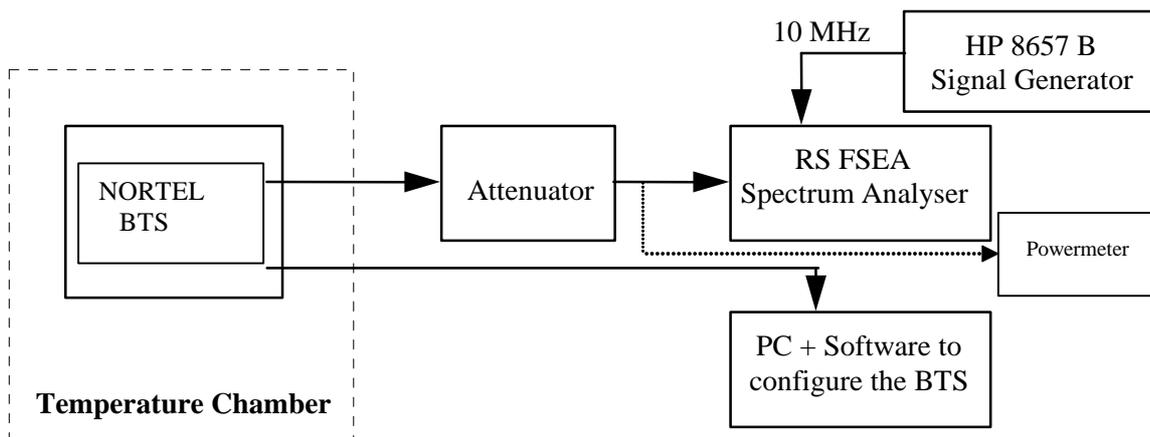

- GSM 6000 Outdoor BTS (AC version) : -33°C until + 50 °C by steps of 10°C; 187 Vac and 264 Vac for each temperature steps

Modules RM PCS 1900MHz are configured with nominal power regulation at maximum power (50W) 47dBm in GMSK modulation and at maximum power (30W) 44,7dBm in 8PSK modulation.

All RM were configured to transmit at maximum power (Static level 0).

A period of at least two hour was performed prior to start radio measurement to ensure that all the components of the oscillator circuit was stabilized for each steps of temperature.

The equipment was configured as shown in Schematic below.
