Power output listed is at the antenna connector. This device operates with a 36.2 dBi parabolic antenna as an integral part of this transmitter. It is to be fix-mounted on outdoor permanent structures and RF exposure compliance must be addressed at the time of licensing, including co-location requirements of 1.1307(b)(3). An RF exposure label, as described for this filing, should be placed on the antenna of subscriber units, visible to all persons in the vicinity of the transmitter exposed to the antenna, for satisfying RF exposure requirements.
