RE: FCC ID: AB6NTE310AG
Model AP7215

I certify that the device FCC ID:AB6NTE310AG is a composite and the NII frequency bands have been removed such that the NII equipment class is no longer valid or marketed after July 20, 2007. Because the software has changed, permissive change class 2 has been filed for the NII portion of the application. The only bands of operation used in this device are DTS bands in 5740 – 5840 MHz and the 2412 – 2462 MHz band as per the original approval

Dated this 29th day of August , 2007
