**Re: AB6NTHV45AA**

Dear Sir or Madam:

This is a Part 15 application for the Nortel Networks iBWA System 3200 Hand Held Terminal (HHT) that operates at 418 MHz. The FCCID of this equipment is AB6NTHV45AA.

The iBWA System 3200 HHT will be used by telecommunications technicians who are responsible for the maintenance and operations of the iBWA System 3200 Microwave Point-to-Point radios (FCCIDs:AB6NTHV5XD and AB6NTHV5XG). The function of the HHT is to permit the remote control and monitoring of the microwave radios (typically installed on a tower) from the ground level. The HHT will not be marketed to the general public.

Nortel Networks requests, pursuant to 47 CFR 0.457 and 0.459 of the commission's rules, that the following items be held CONFIDENTIAL due to their proprietary nature. Nortel Networks considers this leading edge technology developed by Nortel and its partners and being new technology, would not want to make this information available to its competitors.

**Exhibit**

1. Schematics
2. Block Diagrams
3. Parts list

Please call me or write if you have any questions or comments.

Regards,

Denis Lalonde
