RE: FCC ID: AB6S12000

Attention: Glen Moore

I have a few comments on this Application.

1. Please note that while the 731 form states the power is 60 watts, the report provided only shows a measured power of 24 watts in the 1900 MHz range and 26.9 watts in the 850MHz. Please also note that it is the measured power that will be on the grant.
2. In your cover page you mention the other FCC ID numbers used with this system. Please note that each application must stand on its own. Consequently it is only the configurations in the report provided that will be on the grant. If the other configurations in the old FCC ID numbers are to be included or referenced, then you must provide the proper documentation to support those configurations for this application. These documents include a 731 showing all power and designators etc, the reports supporting those levels.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
