Attn: Dennis Ward

**SUBJECT:**

**HITACHI LTD.  
FCC ID: ABLSH-G1000  
Part 24(E) - Certification  
Application ID: ATCB000342  
Response to Questions (03/28/03)**

Dear Dennis:

On behalf of Hitachi Ltd. is our response to your e-mail dated March 28, 2003 requesting additional information for the subject application.

1. Attached is the resubmitted user manual with revised Part 15 non-modification statement (following page 47).
2. The lap-held operating configuration and corresponding user manual statements were verified with Tim Harrington at the FCC prior to the SAR evaluation. Please refer to the attached e-mail correspondence.
3. The body-worn separation distances were not included in the user manual statements based on the fact that the softcase with belt-clip accessory is the only body-worn accessory available and is supplied with the device at time of purchase. The user manual body-worn statement clearly informs the user that this device should only be operated in the body-worn and lap-held configurations with the supplied softcase accessory.
4. Attached is the revised user manual with highest SAR levels listed (page 47).
5. Attached is the resubmitted EMC test report with revised Section 4.1 describing the substitution method used for the radiated spurious emission measurements in accordance with ANSI EIA/TIA-603-A-2001.

If you have any questions or comments concerning the above, please contact the undersigned.

Sincerely,

Jonathan Hughes  
General Manager  
Celltech Labs Inc.
