

RF Exposure / MPE Calculation

No. : 33BE0184-HO-03

Applicant : Panasonic Corporation of North America
Type of Equipment : CD Player System
Model No. : SL-NE5
FCC ID : ACJ-SL-NE5

Panasonic Corporation of North America declares that Model : SL-NE5 complies with FCC radiation exposure requirement specified in the FCC Rules 2.1091 (for mobile).

RF Exposure Calculations:

The following information provides the minimum separation distance for the highest gain antenna provided with the "SL-NE5" as calculated from FCC OET Bulletin 65 Appendix A, Table (B) Limits for General Population / Uncontrolled Exposure. This calculation is based on the highest EIRP possible from the system, considering maximum power and antenna gain, and considering a 1.0mW/cm² uncontrolled exposure limit. The Friis formula used was:

$$S = (P * G) / (4 * \pi * r^2)$$

Where

P = 1.89 mW (Maximum peak output power)
G = 1.93 Numerical Antenna gain; equal to 2.85 dBi
r = 20.0 cm

For: SL-NE5

$$S = 0.00072 \text{ mW/cm}^2$$
