

**RF Exposure / SAR Statement**  
**No. : 11008648S-G**

**Applicant** : **Panasonic Corporation**  
**Type of Equipment** : **Car Audio System**  
**Model No.** : **AT1602**  
**FCC ID** : **ACJ932AT1602**

---

Panasonic Corporation declares that Model : AT1602  
complies with FCC radiation exposure requirement specified in the FCC Rules 2.1091.

**RF Exposure Calculations:**

The following information provides the minimum separation distance for the highest gain antenna provided with the "AT1602" as calculated from FCC Part 1, §1.1310, TABLE 1 (B) Limits for General Population / Uncontrolled Exposure. This calculation is based on the highest EIRP possible from the system, considering maximum power and antenna gain, and considering a 1.0mW/cm<sup>2</sup> uncontrolled exposure limit. The Friis formula used was:

$$S = (P * G) / (4 * \pi * r^2)$$

**Where**

**P = 26.00 mW (Maximum average output power)**  
**G = 0.89 Numerical Antenna gain; equal to -0.53 dBi**  
**r = 20.0 cm**

**For: AT1602**

$$S = 0.00458 \text{ mW/cm}^2$$

Even taking into account the tolerance, this device can be satisfied with the limits.
