Re: Class II Permissive Change Application for Panasonic Single Modular Approval for
Wireless LAN Module, Model WV-VR3004 under FCC ID: ACJ9TAWJ-VR3004

To whom it may concern:

Pursuant to CFR§2.1043, Panasonic Corporation of North America hereby requests a Class II Permissive Change for the subject FCC ID to upgrade U-NII compliance with new Part 15E rules. The original submitted FCC Parts 15C and 15E applications were submitted on June 4, 2014 and two Certification grants were issued on July 22, 2014 by UL Japan, Inc.

We changed the following points from the original model.

- Delete the frequency of 5745-5825MHz and 5755-5795MHz from DTS
- Add the frequency of 5745-5825MHz and 5755-5795MHz to NII
- New rule is also applied for the frequency of 5280-5320MHz and 5310MHz

There is no change for the DFS detection function. Please refer to the attached "Test Report" for details of these modifications. Meanwhile we submit the following documents related to this change. There are no change before and after change except for these documents.

<input checked="" type="checkbox"/>	Test Report (Comparison data)
<input type="checkbox"/>	External Photo
<input type="checkbox"/>	Internal Photo
<input type="checkbox"/>	User Manual
<input type="checkbox"/>	Label drawing/ location
<input type="checkbox"/>	Block Diagram
<input checked="" type="checkbox"/>	Specification
<input type="checkbox"/>	Schematic Diagram
<input type="checkbox"/>	Parts List

This time, we performed the testing and confirmed that this product still meets the minimum requirements of the applicable rules of FCC. Please refer to the test report submitted with this application.

This E.U.T. complies the new rule on "KDB926956 D01 U-NII Transition Plan v01r06" and KDB905462.
Thank you for your attention to this matter.
