Correspondence Ref Numbers: 329092, 32093 and 32103
Subject: Laptop Computer, Model CF-19 with BT and WLAN(a+b+g)

FCC comments issued on November 22, 2006:

Based on reply to preceding corresp., SAR test configurations for this filing are appropriate.

However, please explain in terms of below criteria how the new exhibit about transmitter operations for landscape/portrait display mode qualifies for confidentiality or short-term-confidentiality.

Pursuant to 47 CFR 0.457(d) of the FCC Rules, information that is considered "trade secret" and not routinely available to the public may be withheld from public inspection if a request for non-disclosure is submitted pursuant to 47 CFR 0.459. This process is called requesting confidentiality. A request for confidentiality should reference the rule sections listed above; contain a reason that the material should be withheld from public inspection; identify the specific information by exhibit type, name, and description; explain why the information is a "trade secret;" and state whether this information is publicly available anywhere else. "Trade secret" information is information obtained at considerable company expense and is not normally released to any party or person outside that company.

Answer:

We withdraw our past request for confidentiality for submitted photograph/drawing of Tablet Configuration for SAR Testing in landscape and portrait modes.
