ITPD-05-F006B: Intel WLAN Part 15C / DTS / EA500778

ITPD-05-F006C: Intel WLAN Part 15E / NII / EA797643

ITPD-05-F006D: Sierra EVDO Parts 22H, 24E / PCB / EA623333

To: Diane Poole
Applicant: Panasonic Corporation of North America
FCC ID: ACJ9TGCF-188A
731 Confirmation No: EA500778
Correspondence Nos: 29200, 29201, 29202, 29204
731 Confirmation No: EA797643
Correspondence No: 29221
731 Confirmation No: EA623333
Correspondence Nos: ~~29203~~, 29219
Product: Panasonic Notebook Computer Model CF-18mk3 Family
With Three Internal Transmitters

This is in response to the above mentioned correspondences dated July 15 and 18, 2005. Recently we have been receiving various administrative comments from FCC regarding our request for confidentiality for various filed exhibits of the subject product, and other CF-18mk3 family combinations, with installed individual transmitters.

As a matter of record, the legal applicant and grantee for the subject FCC ID is Panasonic Corporation of North America ("PNA"); and the filed FCC Form 731 correctly declares PNA as the legal party to sign all related legal documents. Our end-product employs individual transmitter modules which were separately certified under their own unique FCC ID's by Intel and Sierra for mobile operation. These exact same transmitters are now installed within our end-product with our own antennas and under our own unique FCC ID for portable operation.

To prevent any further delays and/or confusion regarding exactly which filed exhibits should be treated as confidential, PNA requests the below filed exhibits be treated as confidential.

- Alps Blue Tooth Block Diagrams, Schematics and Description of Operation. This transmitter is authorized under FCC Part 15C and is not user-adjustable; and is not required to provide Tune-Up Procedures and Parts List.
- Intel WLAN Block Diagrams, Schematics and Description of Operation. This transmitter is authorized under FCC Parts 15C and 15E and is not user-adjustable; and is not required to provide Tune-Up Procedures and Parts List.
- Sierra EVDO Block Diagrams, Schematics, Theory of Operation (same as Description of Operation), Antenna Specifications, Product Specifications and Tune-up Procedures.

In accordance with provisions of Section 0.457(d) of the Commission's Rules and Section 552(b)(4) of the Freedom of Information Act, PNA request confidentiality for all of the above declared exhibits, which contain proprietary, confidential and trade secret materials, which would not be routinely made available for public inspection.

PCTEST will file the missing Intel and Sierra confidential documents.

Thank you for your attention, understanding and cooperation in this matter.

Sincerely yours,
Richard Mullen
