FCC comment dated May 15, 2007 for CRN 33078:

Q1) If not in filing already, please explain how compliance with 15.407(e) indoor-only use will be ensured.

A1) Panasonic answer dated May 15, 2007:

Regarding compliance to Sections 15.407(e), the provided WLAN User Manual is provided with the following type warning notice about indoor usage only for U-NII 5.15~5.25 GHz band:

“This product is restricted to indoor use due to its operation in the 5.15 to 5.25 GHz frequency range. FCC requires this product to be used indoors for the frequency range 5.15 to 5.25 GHz to reduce the potential for harmful interference to co-channel Mobile Satellite Systems. High power radars are allocated as primary uses of the 5.25 to 5.35 GHz and 5.65 to 5.85 GHz bands. These radar stations can cause interference with and/or damage this product.”
