Re: Class II Permissive Change Application for Panasonic Single Modular Model WL22A under
FCC ID: ACJ9TGWL22A / Certified under FCC Parts 15C and 15E
For Installation within Panasonic Personal Computer Model FZ-G2(mk2)

To whom it may concern:

We, Panasonic Corporation of North America performed SAR evaluation to mount the module WL22A into the portable host (Panasonic PC Model FZ-G2). The radiated emission testing was not additionally performed due to the following reasons:

- The original FCC testing of the module WL22A was performed when the antenna was connected to the module in an open environment. Under this application, the WL22A itself and its antennas installed inside the host PC enclosure. The physical restraints introduced by the host PC enclosure should have resulted in equal or lower level of radiated emission.
- The original FCC testing of the module WL22A was performed with an antenna of higher gain (2.4GHz: 3.24dBi, 5GHz: 5dBi, 6GHz: 5.59dBi). Both WLAN MAIN antenna (Type: PIFA) and WLAN AUX antenna (Type: PIFA) are the same type as the original ones but have lower gain across level of radiated emission.

Sincerely,

Ben Botros
Manager – Regulatory and Compliance
Panasonic Corporation of North America
