Re: Class II Permissive Change Application for Panasonic Single Modular Model WW21A
under FCC ID: ACJ9TGWW21A / Certified Under FCC Parts 22H, 24E, 27, 90 and 96
For Installation within Panasonic Personal Computer Model FZ-40

To whom it may concern:

We, Panasonic Corporation of North America performed SAR test to mount the module WW21A into the portable host (Panasonic PC Model FZ-40). The radiated emission testing was not additionally performed due to the following reasons:

- This module, WW21A is the same with the one granted on 03/28/2023 (FCC ID: ACJ9TGWW21A). The maximum output power in the 5G NR band n77 which is added on this C2PC application also has the same RF characteristics with it. Therefore, as for the antenna terminal conducted test part, we use the FCC Part 27 test report from that time.
Regarding the radiated spurious emission test, we use the test report issued for this application.

Thank you for your attention in this matter.

Sincerely,

Ben Botros
Manager – Regulatory and Compliance
Panasonic Corporation of North America
