

§ 15.407(f) RF Exposure

RF Exposure Requirements: §1.1307(b)(1) and §1.1307(b)(2): Systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy levels in excess of the Commission's guidelines.

RF Radiation Exposure Limit: §1.1310: As specified in this section, the Maximum Permissible Exposure (MPE) Limit shall be used to evaluate the environmental impact of human exposure to radiofrequency (RF) radiation as specified in Sec. 1.1307(b), except in the case of portable devices which shall be evaluated according to the provisions of Sec. 2.1093 of this chapter.

The limit for maximum RF exposure for 5GHz device is $1\text{mW}/\text{cm}^2$

The formula for calculating RF exposure is given as $S = \frac{PG}{4\pi R^2}$

Output Power = 23.93 dBm

Antenna Gain = 9.9 dBi

Power density is equal to $0.481\text{mW}/\text{cm}^2$.

At a distance of 20 cm.
