

Description of Permissive Change

This report is prepared for FCC class II permissive change. This report is issued as a supplementary report to the original BVADT report no. RF111123C10. The differences compared with original report are using second source components & re-layout the PCB without change the RF emission characteristic and DFS operational software Therefore, only worst case channel was verified in the test report as approved by FCC in KDB 375986.
