Subject: Re: FCC REQUEST FOR FURTHER INFORMATION ON FA-100

Attn: Mr. Chuck Zanardi,

Regarding item 2 of FCC request, we will modify the software to meet the requirement, i.e. when ch. 67 or ch. 13 is selected, carrier power is automatically reduced to 1 watt. When manually selected, it is reduced to 1 watt but makes it possible to revert to full power on demand of operator. The menu process will be changed and so we will amend the operator's manual too.

Software modification of "no reception without a checksum" will be done together with the above.

Best regards,
K. Kawabata
