Subject: Re: FW: FCC Equipment Authorization System

Mr. C. Zanardi

We always use IEC 60945 4th edition, Clause 12.2 for the measurement of Radiation Exposure.
For your quick reference, please find the attached IEC 60945 standard. We use the actual meter, Model 4C of General Microwave to measure the radiation exposure. The measurement value is described in the Operator's Manual.

We apply this not only radiotelephone but radar too.

Is this acceptable or do we have to indicate by MPE method?

Best regards,
K. Kawabata
