1. you are requesting a photo of the external appearance of the device . Submitted with the application is a photo of the gearbox which contains the radar tranceiver. Please be more explicit as to exactly what you want a photograph of.

2. The radar was originally submitted with a display unit which carried the FCC ID. We are now submitting the tranceivers and gearboxes only. The FCC ID is now located on the gearbox assembly rather than on the displays. This is done since many of our units are used with various displays and PC devices supplied by other vendors and manufactures. We also will be using the tranceiver and gearbox with other displays manufactured by Furuno Electric Co. our parent company.

Regards

Charles Zanardi
