Equipment Authorization Branch  
7435 Oakland Mills Road  
Columbia, MD 21046 U.S.A.

To whom it may concern:

We, the undersigned, hereby authorize PCTEST Engineering Laboratory Inc., to act on our behalf in all matters relating to applications for equipment authorization, including the signing of all documents relating to these matters. Any and all acts carried out by PCTEST Engineering Laboratory, Inc. on our behalf shall have the same effect as acts of our own.

We also hereby certify that no party to this application is subject to a denial of benefits, including FCC benefits, pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C. 853(a).

Subject: **FCC E911 Requirements Per §22.921**  
**FCC ID: AEZSCP-7050**

To Whom It May Concern:

Sanyo Electric Co., Ltd. hereby certifies that the cellular telephone (FCC ID: AEZSCP-7050), using the Automatic A/B Roaming – Intelligent Retry method, meets the E911 requirements specified in Section 22.921 of the FCC Rules. This procedure recognizes when a "9-1-1" call is made and, at such time, will override any programming in the mobile unit that determines the handling of a non-911 call and permit the call to be handled by other analog carriers.

Best Regards,

Subject: Affidavit for MEID Protection of Cellular Mobile Telephones  
**FCC ID: AEZSCP-7050**

We hereby certify that the Handheld Portable Cellular Telephone, **FCC ID: AEZSCP-7050** is so designed that it complies with all the requirements for MEID protection specified in Section 22.919.

- a) The transmitter in service has a unique MEID.
- b) The MEID host component is permanently attached to a main circuit board of the mobile transmitter and the integrity of the unit operating software cannot be altered. The MEID is plated from fraudulent contact and tampering. The MEID is encoded using multiplication by a polynomial and the MEID data programmed in the memory with other information.
- c) The MEID is factory-set and cannot be altered, transferred, removed or otherwise able to be manipulated. Cellular mobile equipment is specifically designed such that any attempt to remove, tamper with, or change the MEID chip, its logic system, or firmware originally programmed by the manufacturer will render the mobile transmitter inoperative.

Best Regards,
