6731 Whittier Ave, McLean, VA 22101

March 13, 2004

RE: ICOM Incorporated

FCC ID: AFJ272102

I have a few comments on this Application.

- 1.) Please be advised that the FCC has not yet implemented Adobe 6.x. Some files created in Adobe 6.x cannot be viewed with Adobe 5.x viewers. Please be sure that all files created with Adobe 6.x be saved out as Adobe 5.x compatible. Your Test Report gave my own 5.x viewer problems. Please convert and reload to the ATCB website.
- 2.) Your Confidentiality Request letter asks for block diagram, schematics and operational description to be held Confidential. There is no request for Confidentiality on the parts list and tune up procedure – these exhibits will remain viewable through the FCC website. This is unusual and I would appreciate it if you would please confirm with your client that this is satisfactory.
- 3.) Please provide some idea of the power tuning range for the low and high power settings. I need to determine if this should be categorized as a switched 1W/4W, or a 4W variable product.
- 4.) Table 6.7.5.2 appears to show failing data for low pass filter data at 3.5 KHz. Please comment.
