Dear Sir/Madam,

The above Transceiver is already certified with two separate FCC ID for two different frequency range of operation. We have listed incorrect emission designators while filling form 731. The error has occurred due to a typo in the initial draft specifications provided by ICOM. We confirm that the error does not affect any test results provided by us to FCC for certification.

We request you to correct the designator 8K50FE3 to 11K0F3E listed in both FCC Grants. This designator is for 12.5 kHz Voice channel and complies with the Authorized bandwidth requirement of 11.25 kHz as per Sec.90.209. We also like to delete 11K2F1D from the grants.

Thanking You,

Yours truly,

Tri Minh Luu, P. Eng.,
