Hello Dennis,

A1. It was a typographical error. The revised test report has been uploaded to ATCB site.
A2. It was a typo error too. If you look at the spurious emission plots, you can confirm that we measured with 100 KHz of RBW and 300 KHz of VBW set. It has been corrected in the revised test report as well.

Best Regards,
JaeWook Choi
UltraTech Labs.
