A close-up photograph of a black electronic device. The top surface features a prominent brass threaded component, likely a mounting point for an antenna. To the left of this component is a black rectangular slot. A white rectangular label is affixed to the front face of the device, containing regulatory text. The background is a plain, light-colored surface.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
