

Bill

Please find attached copy for m402 application  
Tastdata2.pdf:

Test data for DSC occupied bandwidth measurement

M402 updated Manual.pdf

Guideline for Part 80 marine CH (See Page 27)

MPE data

Please wait, I believe typical end user uses 9dB gain whip antenna  
We will have some one to generate MPE report

DSC Band width

$B_n = 2 * M + 2 * D$

M is maximum deviation = 5KHz

D is maximum modulation = 2.1KHz

$B_n = 2 * 2.1 + 2 * 5$

=14.2

Emission Type is 14K2G2B

With Best Regards
