Re: Permissive change request for AIERIT17-142R

To Whom It May Concern:

Ritron, Inc. is formally requesting a Class II Permissive Change for the product DR-142 receiver, FCC ID: AIERIT17-142R. Although no circuit changes have been made to the unit, updated measurement results are included herein for approval to the current 47CFR15.107 rules and regulations. Ritron requests that a new Grant of Equipment Authorization be granted without the restriction 05 in the notes prohibiting the manufacturing of this device after July 10, 2005.

The measurement test setup is the same as that in the original submission.
