Re: AIERIT17-445

To whom it may concern:

Ritron formally is requesting that the emission designator 11K0F2D be added to the FCC Equipment Authorization Certificate for the above referenced model. No change to the design of the product was made to allow the support of this type of transmission. The only data in the original submission which might be affected by this addition is the occupied bandwidth. Occupied bandwidth plots are included with this application showing compliance for the new emissions designator.

I trust that this application will be satisfactory. If you have any questions, comments, or concerns, do not hesitate to contact me.

Regards,

Dennis Zimmerman  
Project Engineer
