Re: Extended Frequency Justification on FCC ID: AIERIT34-4650

To whom it may concern:

The DTX-465 30 watt OEM radio module was designed to operate in the frequency band 450-470 MHz.

To aid equipment authorization in other countries within ITU regions 1, 2 or 3 which accept the United States FCC Grant for certification, Ritron is requesting that the FCC lists the frequencies 450-470 MHz under FCC Rule Parts 90 on the FCC Grant. This product is also intended for Federal end users.

For the FCC's Rule Part 90 applications, this radio is used in systems by OEM systems integrators as indicated in the table below. Equipment programming is the responsibility of Authorized Service Personnel. Also, the radio complies with 47 CFR Part 90.203(e) in that the operator cannot directly program the transmit frequencies using the normally accessible external controls.

Per the FCC's KDB634817 guidance, "as an alternative to listing the exact frequencies, we acknowledge that it's a violation of the FCC Rules if this device operates on unauthorized frequencies."

Frequency Range (MHz)	Part 90	Federal Customers/ Not Part 90	Grant Notes	Emission Designator Part 90
450.0000 – 454.0000	x		EF	11K0F3E
454.0000 – 456.0000		x	EF	11K0F3E
456.0000 – 462.5375	x		EF	11K0F3E
462.5375 – 462.7375		x	EF	11K0F3E
462.7375 – 467.5375	x		EF	11K0F3E
467.5375 – 467.7375		x	EF	11K0F3E
467.7375 – 470.0000	x		EF	11K0F3E

Sincerely,

A handwritten signature in black ink, appearing to read "Sam L. Dulaney".
