

RF Exposure / SAR Statement

No. : 28GE0110-YK-A

Applicant : Pioneer Corporation
Type of Equipment : CAR AUDIO with built in Bluetooth
Model No. : 86120-48G00
FCC ID : AJDK018

Pioneer Corporation declares that Model : CAR AUDIO with built in Bluetooth complies with FCC radiation exposure requirement specified in the FCC Rules 2.1091. The "86120-48G00" has 2.2 mW of conducted Peak Output power and 3.49 mW of EIRP. This equipment is considered as a mobile device so that SAR testing is excluded. The Following calculation is the reference data for 20cm distance.

RF Exposure Calculations:

The following information provides the minimum separation distance for the highest gain antenna provided with the "86120-48G00" as calculated from FCC OET Bulletin 65 Appendix A, Table (B) Limits for General Population / Uncontrolled Exposure. This calculation is based on the highest EIRP possible from the system, considering maximum power and antenna gain, and considering a 1.0mW/cm² uncontrolled exposure limit. The Friis formula used was:

$$S = (P * G) / (4 * \pi * r^2)$$

Where

P = 2.20 mW (Maximum peak output power)
G = 1.58 Numerical Antenna gain; equal 2.00 dBi
r = 20.0 cm

For: 86120-48G00

$$S = 0.00069 \text{ mW/cm}^2$$
