

RF Exposure / SAR Statement

No. : 30CE0127-YK-01-A

Applicant : PIONEER CORPORATION
Type of Equipment : CD Receiver
Model No. : DEH-P6200BT
FCC ID : AJDK030

PIONEER CORPORATION declares that Model : CD Receiver complies with FCC radiation exposure requirement specified in the FCC Rules 2.1091. The "DEH-P6200BT" has 1.17 mW of conducted Peak Output power and 1.09 mW of EIRP. This equipment is considered as a mobile device so that SAR testing is excluded. The Following calculation is the reference data for 20cm distance.

RF Exposure Calculations:

The following information provides the minimum separation distance for the highest gain antenna provided with the "DEH-P6200BT" as calculated from FCC OET Bulletin 65 Appendix A, Table (B) Limits for General Population / Uncontrolled Exposure. This calculation is based on the highest EIRP possible from the system, considering maximum power and antenna gain, and considering a 1.0mW/cm² uncontrolled exposure limit. The Friis formula used was:

$$S = (P * G) / (4 * \pi * r^2)$$

Where

P = 1.17 mW (Maximum peak output power)
G = 0.93 Numerical Antenna gain; equal -0.30 dBi
r = 20.0 cm

For: DEH-P6200BT

$$S = 0.00022 \text{ mW/cm}^2$$
