Exhibit A – ID Label and Location Information

The RTM-2100 ID label is shown below in Figure A-1 and Figure A-2. This label includes the FCC ID along with the Collins Part Number and other applicable information. Figure A-1 shows the ID label used for units meeting FAA TSO C63c requirements. Figure A-2 shows the ID label used for units meeting FAA TSO C63d requirements. Both labels are shown here to allow for growth to C63d compliance once TSO C63d is released and the system shows compliance with the new requirements contained therein.

Figure A-3 and Figure A-4 show the location of this label on the fully assembled WRAU-2120 and RTM-2100 unit, respectively.
