Re: Equipment Authorization Under Part 87
VHF-2100E Extended Range Communications Transceiver
FCC ID: AJK8222168

Gentlemen:

Rockwell Collins, Inc. (Rockwell Collins) hereby submits an Application for Equipment Authorization for the **VHF-2100E Extended Range Communications Transceiver (FCC ID: AJK8222168)**.

The VHF-2100E Transceiver is capable of transmitting on both 8.33 and 25 kHz spaced channels between 118-137 MHz and on 25 kHz spaced channels between 138-152 MHz. As provided in Part 87.137(a) footnote 17, Rockwell Collins, as an avionics manufacturer, seeks certification for the capability only and not for permission to operate within the U.S. National Airspace System on 8.33 kHz spaced channels. Additionally, within the 138-152 MHz band the VHF-2100E Transceiver will transmit only at 138-144 MHz, 148-149.9 MHz, and 150.5-150.8 MHz as permitted by FCC Part 87.147(f).

One complete set of documents covering the VHF-2100E, including a detailed product description and test data, is submitted as part of the Application. Rockwell Collins is sending another complete set of documents to the Federal Aviation Administration (FAA) pursuant to FCC Part 87.147(d). A copy of the transmittal letter to the FAA is enclosed as Exhibit 1.

Your early consideration of the Application is respectfully requested. Please direct all inquiries to Mr. John Giff of this office at 703.516.8213.

Respectfully submitted,

Linda C. Sadler
Director, Federal Affairs
