Mr. Andy Leimer
Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

Dear Mr. Leimer:

We have received the Rockwell Collins Inc. letter for Federal Communications Commission (FCC) Certification application of the Aeronautical Satellite Communications High Speed Data Transceivers, Model HST 2110B, HST2120B and SRT-2100B with FCC ID AFJ8222232, AFJ8222234 and AFT8221785 dated May 21, 27, 29, 2008. We have reviewed the submitted information of the high-speed data transceivers, with input and output frequency range in the 1525 MHz to 1559 MHz and 1626.5 MHz to 1660.5 MHz. The HST Transceivers will add the INMARSAT Swift Broadband service to the existing INMARSAT aeronautical services and the SRT-2100B is a multi-channel transceiver that provides both voice and data channels to its users.

We have no objection to the FCC Certification of all these Transceivers. If you require any additional information, please contact Ms. Annette Allender, Spectrum Planning and International Office, at (202) 267-3893.

Sincerely,

Robert A. Frazier
Manager, Spectrum Planning and
International Office
