Mr. Andy Leimer
Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

Dear Mr. Leimer:

We have received the Rockwell Collins letter for the Federal Communications Commission (FCC) certification application of the transmitter, Model UMTS-2100, FCC ID AJK8222635, dated August 25, 2008, and have completed the subject review. We have no objection to the FCC certification of this ground transmitter, which uses cellular telephone technology (SIM card) through a network service provider, for data communication between the crew and the airline terminal using 824.2-848.8 and 1850.2-1909.8 MHz frequency bands.

If you require any additional information, please contact Ms. Annette Allender, Spectrum Planning and International Office, at (202) 267-3893.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Rich".

for
Robert A. Frazier
Manager, Spectrum Planning and
International Office
