RE: FCC ID: AK8CBEH1000\_ATCB003984

Attention: Akane Yamamoto

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that while you have requested that the setup photos be held in temporary confidentiality status these setup photos exist in the test report which cannot be held confidential. The following reports have setup photos within them: IC Test Report(BT).pdf and IC Test Report(WLAN).pdf. Please remove the test setup photos from all reports and provide them only in the setup photo exhibit. Alternately, please remove the setup photos from the list of exhibits to be held in temporary confidentiality.
2. Please note that on some of the data tables in the BT report you list some frequencies as "reference data". For example, on page 83 of the report "FCC Test Data&Instruments(BT).pdf" you list 1946.9MHz as reference data. Please note that the same is true for the WLAN data report. Please explain what this means and why this frequency is considered 'reference data'. Please note that other pages list other frequencies in this manner. Please explain.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
