Re : Sony Corporation
FCC ID : AK8PCWAC150S

Dear Mr. Timothy R. Johnson,

Please find the following replies to your comments dated May 4, 2002;

- 1) The antenna to be connected to center connector of antenna circuit board is the main antenna and there are functions of Transmission and Reception. The antenna to be connected to side connector of antenna circuit board is exclusive use for Reception. At the test of Transmission mode, the antenna was used the one to be connected the center connector. The antenna was used the one to be connected the side connector at the test or Reception property.
- 2) Please find the re-submitted photos of internal in the filing.
- 3) Please find the uploaded description of antenna.
- 4) This product is installed the exclusive antenna with particular connector and sold. The antenna other than this exclusive one is never sold, except for Class II Permissive Change or getting a new FCC ID.
- 5) Please find submitted the confidential request letter in the filing.
- 6) Please find the corrected MPE statement of the manual in the filing.
- 7) Please find the corrected MPE statement of RF Exposure statement in the filing.
- 8) Please find corrected Form 731 in the filing.

Kanako Sanda (Ms.)
