Subject: 答复: Plantronics, Inc., FCC ID: AL8-V510, Assessment NO.: AN08T8441, Notice#1

Dear Lucy,

Please see my answer below:

Q#1: Please provide EUT external photos, internal photos and test setup photos.

The three application documents are uploaded onto CCS Server.

Q#2: Please clarify which FCC ID is correct: AL8-V510 SW MY or AL8-V510.

AL8-V510 is correct.can't you accept the label format?

Q#3: Based upon the theory of operation, this device is designed per Bluetooth 2.0+EDR. As stated in the theory of operation, this device is capable of operating in three different modulations: GFSK, DQPSK and 8DPSK. In the test report, there is no information on which ACL packet Type was selected for the final testing and the worse case investigation. Please address.

BC05MM chipset has EDR feature, but the client disabled this feature in Voyager 510, so the data rate has only 1Mbit/s

Thank you

Hi Elise,

Please address following issues.

Q#1: Please provide EUT external photos, internal photos and test setup photos.

The three application documents are uploaded onto CCS Server.

Q#2: Please clarify which FCC ID is correct: AL8-V510 SW MY or AL8-V510.

AL8-V510 is correct.can't you accept the label format?

Q#3: Based upon the theory of operation, this device is designed per Bluetooth 2.0+EDR. As stated in the theory of operation, this device is capable of operating in three different modulations: GFSK, DQPSK and

8DPSK. In the test report, there is no information on which ACL packet Type was selected for the final testing and the worse case investigation. Please address.

BC05MM chipset has EDR feature, but the client disabled this feature in Voyager 510, so the data rate has only 1Mbit/s

Best Regards,

Lucy Tsai
