## Safety Instructions

Please read the following safety and operational instructions before using your Plantronics product. Please keep these instructions for your reference. When using this product, these basic safety precautions and warnings should be followed to reduce the risk of fire, electric shock, injury to persons and damage to property.

### General

Operating, charging and storage temperature is 0°C to 40°C (32°F to 104°F).

### ⚠ Warnings

- Only use those Plantronics products designed for use with this Plantronics system.
- CHILDREN. Never allow children to play with the product—small parts may be a choking hazard.
- Plug the AC adapter into the outlet nearest the equipment that is easily accessible.
- To reduce the risk of electric shock, explosion or fire, use only the supplied charger or Class 2 AC adapter to charge the headset. Ensure that the voltage rating (e.g. 120v, 60 Hz) corresponds to the power supply you intend to use.
- Do not disassemble the product or AC adapter as this may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock or fire when the product is subsequently used.
- Do not insert anything into the product because this may cause damage to the internal components or cause injury to you.
- If this system includes a mobile phone headset, check local laws regarding use of a mobile phone and headset while driving. If you use the headset while driving, ensure your attention and focus remain on driving safely.
- Use of a headset that covers both ears will impair your ability to hear other sounds. Use of such a headset while operating a motor vehicle or riding a bicycle may create a serious hazard to you and/or others, and is illegal in most states and regions.
- If this system includes a Bluetooth headset, observe all signs or instructions that require an electrical device or RF radio product to be switched off in designated areas, such as hospitals, blasting areas, potentially explosive atmospheres, and aircraft.
- Avoid contact with liquids. Do not locate this product near water, for example, near a bathtub, or sink, in a wet basement, or near a swimming pool.
- Discontinue use of product and contact Plantronics if the product overheats, has a damaged cord or plug, if the product has been dropped or damaged, or if the product has come into contact with liquids.
- This product should never be placed over or near a heat register and should not be placed in locations without which do not have proper ventilation.
- If you experience a skin irritation after using this product, discontinue use and contact Plantronics.
- Exposure to high volume sound levels or excessive sound pressure may cause temporary or permanent damage to your hearing. Although there is no single volume setting that is appropriate for everyone, you should always use your headset/headphones with the volume set at moderate levels and avoid prolonged exposure to high volume sound levels. The louder the volume, the less time is required before your hearing could be affected. You may experience different sound levels when using your headset /headphones with different devices. The device you use and its settings affect the level of sound you hear. If you experience hearing discomfort, you should stop listening to the device through your headset/headphones and have your hearing checked by your doctor. To protect your hearing, some hearing experts suggest that you:
  1. Set the volume control in a low position before putting your headset or headphones on your ears and use as low a volume as possible.
  2. Avoid turning up the volume to block out noisy surroundings. Whenever possible, use your headset or headphones in a quiet environment with low background noise.
  3. Limit the amount of time you use headsets or headphones at high volume levels.

4. Turn the volume down if the sound from the headset/headphones prevent you from hearing people speaking near you.

See [www.plantronics.com/healthandsafety](http://www.plantronics.com/healthandsafety) for more information on headsets/headphones and hearing.

**To avoid the risk of electric shock, explosion, fire or leakage of corrosive or toxic chemicals, please observe the following charging and battery warnings:**

### ⚠ Charging Warnings

- Use only the charger supplied by Plantronics to charge the product. Do not use the charger for any other purpose. Ensure that the voltage rating corresponds to the power supply you intend to use.
- Charge the headset/headphones according to the instructions supplied with the unit.
- Plug the AC adapter or charger into an outlet that is near the equipment and will be easily accessible.
- Never charge the battery where the temperature may fall below 0°C (32°F) or rise above 40°C (104°F) - for example in an unattended motor vehicle.
- Avoid charging the battery while it is unattended.

### ⚠ Headset Battery Warnings

The headset is equipped with a non-replaceable battery. To reduce the risk of fire or injury to persons, read and follow these instructions.

Do not attempt to open the headset or remove the battery.

Do not dispose of the headset or battery in a fire. The battery may explode. Check local laws for disposal instructions.

Do not open or mutilate the battery. There may be corrosive materials which can cause damage to eyes or skin and may be toxic if swallowed.

Charge the headset according to the instructions supplied with the headset.

RECYCLING: The battery used in your headset must be recycled or disposed of properly. Contact your local recycling center for proper disposal of your headset.
