Federal Communications Commission,
Attention: Steven Dayhoff
Via Electronic Filing

Applicant: KENWOOD COMMUNICATIONS CORP.
Equipment: FCC ID: ALH31113110 EA98744 CORRES. 16233

Steven:

Thank you very much for your welcome information on the Motorola Transmitters.

The Kenwood device is a fixed, base-mounted Repeater - not a mobile. The limits should be per Rule 1.1310, Table 1, A, for Occupational/Controlled Exposure.

Previously, calculated results were submitted. Tests were performed using a 0dBd antenna, specified by the Applicant, with 100% duty cycle. The result was found to be 0.443 mw/cm² [Limit = 1.50 mw/cm², (450/300)] for whole body average (OET Bulletin 65 Supp.C) at a separation distance of 42cm.

Attached please find Amended Environmental Assessment Report, reflecting the above.

We trust this now meets the requirements of the Commission and that the Grant will be forthcoming A.S.A.P.

Personal regards,

A handwritten signature in black ink, appearing to read 'Morton Flom', is written over the typed name. The signature is fluid and cursive.

MORTON FLOM, P. Eng.
