

Applicant: Kenwood Communications Corp.
FCC ID: ALH31241110 EA101226
Correspondence Number: 20219

Item 1:

The EUT is capable of receiving over the frequency range of 137 – 1300 MHz (please see test result pages 10 and 11 of report) and is unable to receive signals in the cellular R/T service (see page 13 of test report). The receive frequency ranges were incorrectly reported on the Form 731 and in the report.

a) We authorize you to amend Form 731 para. 8(a) to list the following:

- 137 - 174 MHz
- 216 – 260 MHz
- 410 – 470 MHz
- 0.1 to 824 MHz
- 849 to 870 MHz
- 894 to 1300 MHz

b) Please find Amended page 5 uploaded in the test report exhibit indicating the changes as listed above.

The Applicant has informed us that the user manual will be corrected.

Item 2:

The transmitter operates only in the Amateur bands. It normally would use the same FCC ID of ALH31241110.

Item 3:

We, including the Applicant, are aware that, technically the Commission will certify Scanning Receivers only up to 960 MHz.
