731 Confirmation No.: EA172230
Correspondence Ref. No.: 22120**

Dear Steve:

On behalf of Kenwood Communications Corporation is an amendment in response to item 4 of your e-mail dated February 28, 2002 requesting additional information for the subject application.

1. Please see item f on page 6 of the SAR report for justification of the probe conversion factors used. The probe conversion factors differ between Celltech and SPEAG because they are different probes. The system manufacturer uses their own E-field probe (SN:1507) for the system verification, and we use our own probe (SN:1590 manufactured by SPEAG). This explains the difference between the probe conversion factors.

If you have any further questions regarding the above, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Shawn McMillen".

Shawn McMillen
