---

February 26, 2004

To: FCC  
Attention: Stan Lyles

Applicant: Kenwood USA Corporation  
Equipment: FCC ID: ALH36913210 EA812281  
Reference: Correspondence Number 26424

- 1) This is your authorization to remove Part 95J from the Form 731.
  
- 2) Please be aware that there were two separate files uploaded to the manual exhibit - the 'complete' manual (9 pages) and one additional page of information. Please advise if the Commission will no longer accept preliminary manuals and will accept final user manuals only.
  
- 3) This portable is supplied only with one antenna – either a stubby or ¼ wave whip – not both. The user makes the choice! The SAR testing was performed using the Stubby and ¼ wave whip. The worst case was reported in the SAR report.
  
- 4) 'Your FYI': Does this mean that you, the FCC, does not require SAR evaluations for PTT radios in the 136-174 MHz with R.F. Power Outputs of 1-5 watts? Please clarify.
  
- 5) Your kind consideration and early certification will be very much appreciated by Kenwood.

mf/cva

Sincerely yours,

Morton Flom, P. Eng.
