Subject: RFI related modifications incorporated  
into unit with - FCC ID: AMPJ91B

Dear Sirs:

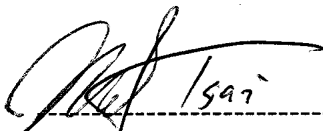

This letter serves as our declaration that all modifications listed below were implemented in the sample submitted for testing. We further declare that the same modifications will be implemented into all production units to enhance compliance of the units to FCC limits.

The modifications include the following:

- 1) Added one ferrite core on the one bundle of wires connected between CRT board and the mainboard. (see photo 10)
- 2) Added a metal cover on the rear side of CRT board and it was connected to chassis by 9 ground wires (see photo 5)
- 3) Added one ferrite core on tilt wire with three turns (see photo 8)
- 4) Added one ferrite core on the ground wire connected from CRT tube to CRT board. (see photo 7)
- 5) Added one ferrite core on the focus wire with two turn. (see photo 7)
- 6) Added one ferrite core on the G2 wire with one turn. (see photo 7)
- 7) Added one ferrite core on the safety ground wire with four turns. (see photo 7)
- 8) Added one ferrite core on the wire from FBP to mainboard with two turns. (see photo 7)
- 9) Added 3 jump wires, 4 resistors, 2 beads and 3 capacitors on the solder side of power board. (see photo 11)

If you have any further questions or comments regarding the above, please don't hesitate to contact Mr. Jonson Lee of ADT Lab. at fax No.:886-2-2605-2943 or E-mail: jonson@mail.adt.com.tw.

Sincerely yours,

-----  
Kent Tsai / Safety Manager  
Jean Co., Ltd.
