Re.: Letter of Explanation for Model PC76XL Mobile Citizen Band Transceiver Class II Permissive Change

FCC Identifier: AMW-UT232K

To Whom It May Concern:

Please note that the above referenced Mobile CB transceiver unit is electrically and mechanically identical with originally approved model PC76XL.

Uniden is in the situation that original PLL (phase locked loop) Integrated Circuit manufacture cannot continue to produce the same component anymore and we did not have any choice but finding the identical custom-made IC by different vender. The new set of the IC is made under the same design, block diagram and same specification. Although the level of the spurious emission is slightly changed, the new IC performs identical with original.

Uniden wishes to submit this model for Class II Permissive Change.

Please contact the undersigned if you have any questions or need any further information regarding this matter.

Regards,
