

Attestation Statement

Date: August 1, 2002
To: FCC Lab - Reviewing Engineer
From: Jim Haynes
RE: FCC Part 15.121 - Compliance to the Cellular Band Exclusion

Although this statement is included within the Operational Description Exhibit, please note that this is separately signed below pursuant to the Commission's requirements.

=====

Pursuant to the requirements contained in Part 15.121 of the Commission's Rules, this scanning receiver does not have the capability of tuning the frequencies assigned to the Domestic Public Cellular Radio Telecommunications Service.

In this circuitry, this device is not readily alterable to restore the cellular band coverage because the inventory of frequencies contained within this band is not available in the microprocessor. Also, the microprocessor is fixed soldered and not easily removable.

In addition, the critical circuitry is "hardened" with a black epoxy that covers the area of the circuitry that might be modified to circumvent the design efforts referenced above.

Therefore, since the clipping of leads; or the installation of a simple component such as a diode, resistor, or a jumper wire; or the reprogramming of any semiconductor device contained within this unit cannot be accomplished using a special access code or a personal computer; This is to certify that the conditions mandated in part 15.121 have been met.

James R. Haynes
