

ATTESTATION

February 7, 2006

To: FEDERAL COMMUNICATIONS COMMISSION
Office of Engineering & Technology
Laboratory Division
Equipment Authorization Branch
7435 Oakland Mills Road
Columbia, MD 21046

Subject: EXCLUSION OF CELLULAR BAND RECEPTION

Applicant: Uniden America Corporation
181 N. Country Club Road, P.O. Box 580
Lake City, South Carolina 29560
James R. Haynes, Vice President, Engineering and Regulatory Affairs

FCC IDENTIFIER: AMWUB335

Dear Sirs or Madams:

Pursuant to the requirements contained in Part 15.121 of the Commission's Rules, this scanning receiver does not have the capability of tuning the frequencies assigned to the Domestic Public Cellular Radio Telecommunications Service. In this circuitry, this device is not readily alterable to restore the cellular band coverage because the inventory of frequencies contained within this band is not available in the microprocessor. Also, the microprocessor is fixed soldered and not easily removable. In addition, the critical circuitry is "hardened" with a black epoxy that covers the area of the circuitry that might be modified to circumvent the design efforts referenced above. Therefore, since the clipping of leads; or the installation of a simple component such as a diode, resistor, or a jumper wire; or the reprogramming of any semiconductor device contained within this unit cannot be accomplished using a special access code or a personal computer; This is to certify that the conditions mandated in part 15.121 have been met.

Please contact the undersigned if you have any questions or need any further information.

Regards,

A handwritten signature in black ink that reads "James R. Haynes". The signature is stylized with a large, looped initial "J" and a cursive script.

James R. Haynes
Vice President, Engineering and Regulatory Affairs
