

## Other information

1. Actual frequencies for each channel:

| CH | Frequency  | CH | Frequency  |
|----|------------|----|------------|
| 1  | 905.728MHz | 6  | 915.968MHz |
| 2  | 907.776MHz | 7  | 918.016MHz |
| 3  | 909.824MHz | 8  | 920.064MHz |
| 4  | 911.872MHz | 9  | 922.112MHz |
| 5  | 913.920MHz | 10 | 924.160MHz |

2. Chipping rate: 1.366 M cps

3. Antenna Gain for both the Base unit and Handset:

Gain respect to isotropic  
Base unit: + 3.34 dBi  
Handset : + 1.74 dBi

Note that antenna gain measurement were conducted based on substitution method using with dipole antenna.

4. Processing Gain: Please see attached documents.
