Reference: PORTABLE CELLULAR TELEPHONE
Model: ASC911
FCC ID: AMWUH052

DECLARATION OF SINGLE NUMBER DIALING
EXPLANATION FOR LACK OF SAR REPORT

Pursuant to a meeting and email exchange between Mr. Kwok Chan (of the FCC Laboratory) and myself, it is my understanding that no SAR (Specific Absorption Rate) data is required to be included with this application. The reason is that the subject device is only capable of generating calls to the Emergency 9-1-1 network. Other telephone numbers cannot be programmed into this device. Therefore, this device will not be used for extended time duration calls by comparison to conventional portable cellular telephones.

If you need more specific information concerning this feature, please contact the undersigned. Thank you for your consideration in this matter.

James R. Haynes

Vice President, Engineering and Regulatory Affairs
