USA — Federal Communications Commission (FCC)

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

i) FCC ID of Wireless Modules

There is no FCC ID shown on the enclosure of this model. Instead you will find an indicator pointing the location of the FCC ID at the bottom side of your ThinkPad computer as shown below.

Note: The FCC ID of applicable wireless mini-PCI cards are ANOU58H004 and ANOM3AWEB56GA.

ii) Installation of Wireless LAN Mini-PCI Card

If no integrated wireless LAN Mini-PCI Card has been preinstalled in your ThinkPad computer, you can install one, provided by IBM as an option. Please plug the option wireless card into the Mini-PCI Card slot located under the keyboard as shown below. To remove the keyboard, refer to "Removing the keyboard" of the Service and Troubleshooting Guide.

Attention for the BIOS Lock Protection:

If you install an unauthorized wireless LAN Mini-PCI Card that was not approved to use for the ThinkPad X30 Series computer, the computer does not start, but only displays an error message and emits beeps.

iii) The FCC RF Safety Requirement

The radiated output power of the Wireless LAN Mini-PCI Cards authorized to use for the ThinkPad X30 computer are far below the FCC radio frequency exposure limits. Nevertheless, the ThinkPad X30 computer shall be used in such a manner that the potential for human contact during normal operation is minimized as follows:

CAUTION:

To comply with FCC RF exposure compliance requirements, a separation distance of at least 20 cm (8 inches) must be maintained between the antenna for the integrated Wireless LAN Mini-PCI Card built in to the screen section and all persons.

IBM High Rate Wireless LAN Mini-PCI Adapter
(FCC ID: ANOM3AWEB56GA)

Note: The transmission diversity function is implemented for the Card. The function does not emit radio frequencies simultaneously from both antennas. One of the antennas is selected automatically or manually (by users) to have good quality of radiocommunication.

Use of Wireless options

Your ThinkPad computer is approved for use of the integrated Wireless LAN Mini-PCI Card with one or more wireless option PC Cards in the PC Card slot and USB port simultaneously. Please make sure of the following conditions on use of option wireless cards.

1. Visit the IBM site at www.ibm.com/pc/qtechinfo/MIGR-39377.html and confirm the updated list of RF option devices that have been approved to cooperate with the integrated wireless feature.
2. When you use any other RF option device that is not listed on the IBM site, all other wireless features including the integrated transmitter in your ThinkPad computer are required to be turned off.
3. Users are requested to follow the RF Safety instructions on wireless option devices that are included in the RF option device's user's manual.

iv) Interference Statement

An improper installation or unauthorized use may cause harmful interference to radio communications. Also any tampering of the internal antenna will void the FCC

certification and your warranty. Refer to the “Appendix D. Notices, Electronic emission notices” of the ThinkPad X30 Series Service and Troubleshooting Guide for more detail.

Canada — Industry Canada (IC)

Certification number

The term “IC” before the equipment certification number only signifies that the Industry Canada technical specifications were met. The certification number “**IC: 349E-TK1TP10B**” on the label at the bottom of the computer is for the integrated Bluetooth module. The number for the integrated wireless LAN Mini-PCI Card is affixed on the Card installed in the Mini-PCI Card slot, as shown below.

Attention: You can install or remove the wireless LAN Mini-PCI Card by yourself. If you install a wireless LAN Mini-PCI Card that is not authorized for the ThinkPad X30 Series computer, the computer does not start, but only displays an error message and emits beeps.

Low Power License-Exempt Radiocommunication Devices (RSS-210)

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

Numéro d'homologation signifie

Le terme «IC» avant le numéro d'homologation signifie seulement que les normes d'Industrie Canada ont été respectées.

Le numéro d'homologation IC: 349E-TK1TP10B qui figure sur l'étiquette apposée sous l'ordinateur concerne le module Bluetooth intégré. Le numéro d'homologation pour la carte

mini-PCI pour réseau local sans fil est collé sur la carte installée dans l'emplacement correspondant, comme indiqué dans la figure précédente.

Attention : Vous pouvez installer ou retirer la carte mini-PCI pour réseau local sans fil vous-même. Si vous avez installé une carte de ce type qui n'est pas homologuée pour l'ordinateur ThinkPad X30 Series, l'ordinateur ne démarrera pas ; un message d'erreur sera affiché et des bips sonores seront émis.

Permis d'émission à faible puissance - Cas des appareils de communications radio (CNR-210)

Le fonctionnement de ce type d'appareil est soumis aux deux conditions suivantes: (1) Cet appareil peut perturber les communications radio, et (2) cet appareil doit supporter toute perturbation, y compris les perturbations qui pourraient provoquer un dysfonctionnement.

Pour empêcher que cet appareil cause du brouillage au service faisant l'objet d'une licence, il doit être utilisé à l'intérieur et devrait être placé loin des fenêtres afin de fournir un écran de blindage maximal. Si le matériel (ou son antenne d'émission) est installé à l'extérieur, il doit faire l'objet d'une licence.

The equipment type approval does not imply that the frequencies will be cleared automatically/operating licence will be granted as these are matters to be examined on case by case basis on the receipt of the application to WPC.

Notice for Users in Singapore

OPERATING CONDITIONS UNDER WHICH THE RADIOCOMMUNICATION EQUIPMENT ARE EXEMPTED FROM LICENSING

To maximize frequency sharing while minimizing radio interference, the following operating conditions are imposed to confine the propagation of radio signals within a building or at a localised site:

1. The radiocommunication equipment shall be used for in-building or localised on-site operations;
2. The radiocommunication equipment shall operate at frequencies or frequency bands designated by IDA on non-exclusive basis;
3. The radiocommunication equipment shall not operate beyond the maximum permissible output power designated by IDA to confine the propagation of radio signals to a small localised area;
4. For an on-site localised operation with little obstruction by the nearby buildings or terrain, height of any external antenna, if installation approved by IDA, shall not be more than 10 metres above ground level to limit the radio wave propagation; and
5. No repeater station shall be used to extend the radio coverage.
