

A photograph of a white plastic mechanical assembly, possibly a toy component, with a USB connector and a label. The assembly is shown against a dark blue background. A brown PCB with a USB connector is attached to the top. Several colored wires (red, black, yellow, green, blue) are connected to the USB connector. A white label with black text is attached to the front of the assembly. The label reads "MATTEL" and "00U0166 4/4/2000". The assembly includes various white plastic parts, including a large curved piece at the bottom and several small cylindrical pieces. Some of these pieces have small metal rings or pins attached to them.
